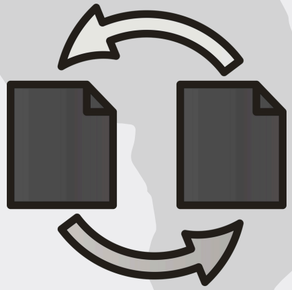
cyber NOVA

Reimagining Healthcare Data.

The Real Struggle

Patients today face broken healthcare journeys

Records are fragmented across hospitals.



Delays in data transfer cause treatment delays

medical errors due to data transfer problems

The Vision We Believe In

What if your entire medical history could be available instantly, securely, and with your consent anywhere?

Raaya envisions a future where:

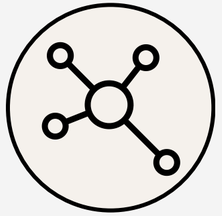
Records are unified.

Patients own and control access.

medical errors due to data transfer problems

What is رعايا

Raaya is a health data infrastructure powered by blockchain.



Connects all hospitals under one digital system

Built with zero-trust architecture and government-grade security

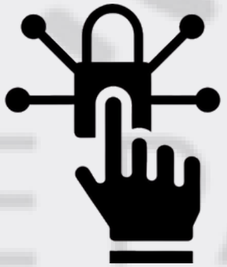
Stores medical records immutably & transparently

Gives patients complete control over who can see their data

Log In. No Headaches.

Raaya integrates directly with UAE Pass

Instant login



Consent-based access for healthcare providers

Secure authentication

Why Blockchain?

Tamper-proof: Medical records are immutable

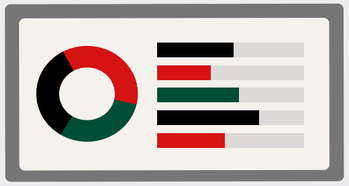
Transparent: Audit logs track who accessed what

Distributed: No single point of failure

Efficient: Blockchain-based smart contracts simplify insurance, billing, and access control

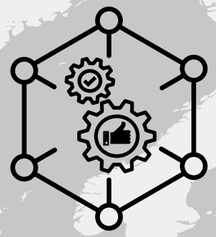
For Governments & Hospitals

Raaya is more than software it's an ecosystem



Centralized dashboard for health authorities

Hospital portals for patient and professional data



Built to integrate with your existing infrastructure

For Insurance Companies

One secure platform. Full transparency.

Verify medical records instantly

Reduce fraud with accurate, blockchain-verified data

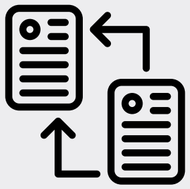
Streamline claims processing

Lower operational costs and reduce paperwork

Empowering Patients

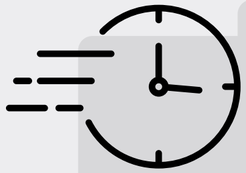
Patients in Control. Always.

Full access to your medical records anytime, anywhere



Secure, seamless sharing with doctors, specialists, and hospitals

Complete control over who accesses your data



Reduce waiting times, duplicate tests, and redundant visits

Designed to Deploy, Not Disrupt

No major overhaul needed

We plug into existing systems public or private

Data stays within each state's data center

Unified access through Raaya's national layer

Healthcare, Reinvented

With Raaya, we're not just fixing problems
we're laying the foundation for intelligent, and a new era healthcare.

We're Looking for Partners To pilot
Test Our system .

Let's build a future where healthcare data is always accessible, secure, and patient-centered.

Reach out to us today to be part of the healthcare revolution
